Comment Text :

- 1 [ ] -->The current EIS does not satisfy my fears as to the transport of High level waste thru the Clark County area. Since there are only two major routes of travel, I-15 and US93/95 any accident on either route will cause major harm to the tourist based
- 2... economy that we depend upon. Further the valley has already supported the NTS and Nellis AFB for years. While it has been a give and take relationship it is time that
- 3 the federal government not attempt to move such waste over our streets. I support the positions of all the elected officials to oppose this project.

2 cont.

[ ] As a 21 year veteran of law enforcement I cannot see how any such movement of material over heavily travelled roadways will never result in a accident that will cause major harm to the life and safety of this community. Such an accident even if it does not result in any radiation leakage or spill will still be a public relations nightmare for the community. No governmental agency can every say that such an accident will not occur.
